

THE JOURNEY TO PALOMAR

TEACHER GUIDE

A comprehensive Teacher Guide accompanies *The Journey to Palomar*

- For teachers of grades 6 -12
- Download the free Teacher Guide PDF at pbs.org
- Teacher Guide PDF also included on the DVD from PBS Home Video

Developed by Cary Sneider, Ph.D.

in collaboration with Mason Productions, Inc. and
The Astronomical Society of the Pacific

Dr. Cary Sneider is currently Associate Research Professor at Portland State University, Oregon. He was formerly Vice President for Programs at the Museum of Science in Boston. Dr. Sneider's research and development interests have focused on helping students unravel their misconceptions in science, and on new ways to link science centers and schools to promote student inquiry. Dr. Sneider has created teacher guides for the elementary, middle, and high school levels. He helped to develop the National Science Education Standards and contributed to Designing Professional Development Programs for Teachers of Mathematics and Science. In 1997 he received the Distinguished Informal Science Education award from the National Science Teacher's Association and is a National Associate of the National Academy of Sciences.

The Astronomical Society of the Pacific (ASP) is the lead partner for the development of the teacher guide for *The Journey to Palomar*. The ASP is a recognized leader in the field of astronomy education, and with a strong network of formal and informal educators that they serve through a variety of programs. www.astrosociety.org/education
