

PBS AND BBC RELEASE FIRST-LOOK IMAGES FROM THE SERIES WALKING WITH DINOSAURS PREMIERING LATER THIS YEAR

ARLINGTON, VA/LONDON, ENGLAND; Jan. 22, 2025 — More than 25 years after it first stomped across our TV screens, the iconic **WALKING WITH DINOSAURS** is returning in a major new BBC Studios production for the BBC and PBS, co-produced with ZDF and France Télévisions. This new six-part series will take viewers on a unique journey back through time, revealing the incredible life stories of these long-lost giants. It will premiere later this year on PBS, [PBS.org](https://www.pbs.org), the [PBS App](#), and BBC One and iPlayer. Today, PBS and BBC have released three first-look images of an Albertosaurus and a Pachyrhinosaurus.

In an exciting reimagining of one of the BBC's best-loved factual shows, each episode of **WALKING WITH DINOSAURS** tells the dramatic story of an individual dinosaur whose remains are currently being unearthed by world-leading dinosaur hunters. Thanks to cutting-edge science, experts can determine how these prehistoric creatures lived, hunted, fought, and died more accurately than ever before. As the dinosaurs' bones emerge from the ground, the series brings these prehistoric stories to life with state-of-the-art visual effects — making each episode a gripping dinosaur drama based on the latest evidence.

ALBERTOSAURUS (pictured below)

Albertosaurus is a smaller, but just as deadly, relative of the T. rex. Young Albertosaurus were capable of reaching speeds of up to 30 miles an hour, the fastest animal in **WALKING WITH DINOSAURS**. Paleontologists believe they hunted their prey in packs before devouring them with their dozens of large, sharp teeth.

Many dinosaurs are now known to have feathers. Our Albertosaurus has fur-like feathers, something we can infer thanks to fossil evidence of related species preserving these details perfectly.

PACHYRHINOSAURUS (pictured below)

Closely related to Triceratops, Pachyrhinosaurus is a plant-eater with a thick slab of keratin-covered bone over its nose, known as a boss, used for combat between males.

There are three known species of Pachyrhinosaurus. Our species is Pachyrhinosaurus lakustai, which possesses a unique singular horn projecting from the center of its head – informally known as the ‘unicorn’ horn. 73 million years ago, mega herds as big as 40,000 Pachyrhinosaurus could have embarked on epic migrations over hundreds of miles in search of food and nesting grounds, much like caribou do today.

WALKING WITH DINOSAURS, a six-part series, was commissioned for BBC One and BBC iPlayer by Jack Bootle, Head of Commissioning, Specialist Factual. Diana El-Osta is the Executive in Charge for PBS. Bill Gardner is Editorial Consultant for PBS. It is a BBC Studios Science Unit Production co-produced with ZDF and France Télévisions for BBC and PBS. The Executive Producers are Andrew Cohen and Helen Thomas. The Showrunner is Kirsty Wilson. The Producer/Directors are Stephen Cooter; Tom Hewitson and Owen Gower and the Line Producers are Max Brunold and Libby Hand. The BBC Commissioning Editor is Tom Coveney. BBC Studios is handling global distribution.

About PBS

[PBS](#), with more than 330 member stations, offers all Americans the opportunity to explore new ideas and new worlds through television and digital content. Each month, PBS reaches over 42 million adults on linear primetime television, more than 15 million users on PBS-owned streaming platforms, and 56 million people view PBS content on social media, inviting them to experience the worlds of science, history, nature, and public affairs; to hear diverse viewpoints; and to take front-row seats to world-class drama and performances. PBS’s broad array of programs has been consistently honored by the industry’s most coveted award competitions. Teachers of children from pre-K through 12th grade turn to [PBS LearningMedia](#) for digital content and services that help bring classroom lessons to life. As the number one educational media brand, [PBS KIDS](#) helps children 2-8 build critical skills, enabling them to find success in school and life. Delivered through member stations, PBS KIDS offers high-quality content on TV — including a PBS KIDS channel — and streaming free on [pbskids.org](#) and the [PBS KIDS Video app](#), games on the [PBS KIDS Games app](#), and in communities across America. More information about PBS is available at [PBS.org](#), one of the leading dot-org websites on the internet, [Facebook](#), [Instagram](#), or through our [apps for mobile and connected devices](#). Specific program information and updates for press are available at [pbs.org/pressroom](#) or by following [PBS Communications on X](#).

About BBC Studios

BBC Studios is a commercial subsidiary of the BBC Group with sales of £2.1 billion (2021/22: £1,630 million). Able to take an idea seamlessly from thought to screen and beyond, the business is built on two operating areas: the global Content Studio, which produces, invests and distributes content globally and Channels & Streaming, with BBC branded channels, services and joint ventures in the UK and internationally.

Around 2,500 hours of award-winning British programmes are made by the business every year, with over 80% of total BBC Studios revenues coming from non-BBC customers including Discovery, Apple and Netflix. Its content is internationally recognised across a broad range of genres and specialisms, with brands like Strictly Come Dancing/Dancing with the Stars, Top Gear, the Planet series, Bluey and Doctor Who. BBC.com is BBC Studios' global digital news platform, offering up-to-the-minute international news, in-depth analysis and features.
